

The Swedish Institute at Athens and the Digital Periegesis Project  
(Uppsala University)  
welcome you to a workshop

## *Gazetteering Pausanias: Athens and Beyond*

*Anna Foka, Elton Barker, Brady Kiesling, Kyriaki Konstantinidou & Linda Talatas*

The ongoing Digital Periegesis (Pausanias) project, based in Uppsala with the support of the Swedish Research Council and Swedish Institute in Athens, is finalizing its annotation of Pausanias' places, people, events, objects, and quotations using Recogito. Our planned next step is to generate an open gazetteer of Pausanias' places using Wikidata, linking to existing gazetteers (e.g. Pleiades, ToposText, DAI/Arachne) and Judith Binder's Magnum Opus (at Dipylon.org). Since this project's inception, and a preliminary meeting of interested parties in 2018, substantial progress has been made by the Athens scholarly community on digital resources relevant to such a gazetteer. We hope you will join us to take stock and share visions for the future of mapping Greek antiquity.

The workshop takes place on Thursday, January 26, 2023, 17.00-19.00h  
at the Swedish Institute at Athens, Mitseon 9
