

# Water, society and climate in the Eastern Mediterranean (7.5 hp)

Advanced course, in English, HT-25

Swedish Institute at Athens

Uppsala University, Department of Archaeology, Ancient History and  
Conservation & Department of Human Geography

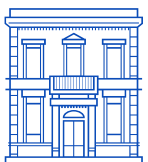

Do you want to learn more about freshwater availability, consumption and climate change in the past, present and future?

With its long human history, the Eastern Mediterranean offers a unique opportunity to investigate links between freshwater availability, consumption and climate change in a long-term perspective.

The course starts in Uppsala, followed by two weeks in Athens and the Peloponnese, ending with an individual assignment to be presented in Uppsala.

**Apply through [www.antagning.se](http://www.antagning.se), deadline April 15**  
**(Note: through the Swedish language page, code UU-50000)**
